

YUNESH TIMSINA

Java Backend Developer

Kathmandu, Nepal | +977-9742498100 | yuneshtimsina@gmail.com | github.com/yuneshbyte01

PROFESSIONAL SUMMARY

Aspiring Java Backend Developer with hands-on experience building secure, scalable backend systems using Java, Spring Boot, and RESTful APIs. Proficient in SQL schema design and query optimization across PostgreSQL and MySQL. Demonstrated ability to deliver production-level systems including a fintech wallet API, a clinic management system, and a movie booking platform. Eager to grow within a healthcare technology environment and contribute to value-based care solutions.

PROFESSIONAL EXPERIENCE

Software Development Intern | [KK Smartways Pvt. Ltd., Lalitpur](#) | *Dec 2025 – Feb 2026*

- Contributed to the development and maintenance of a Dental Clinic Management System (DCMS)
- Migrated frontend from JSP to Angular, improving application scalability and user experience
- Refactored backend controllers to expose clean, JSON-based REST APIs
- Integrated Angular frontend with Spring Boot backend services end-to-end
- Participated in debugging, unit testing, and API performance improvements

Backend Developer | [Academic & Personal Projects](#) | *2023 – Present*

- Developed 10+ RESTful APIs using Spring Boot across multiple independent applications
- Implemented JWT authentication and fine-grained role-based authorization with Spring Security
- Designed normalized relational database schemas and wrote optimized SQL queries
- Applied layered architecture (Controller → Service → Repository) consistently across all projects

PROJECTS

HamroPaisa – Digital Wallet & Money Transfer API — *Java, Spring Boot, PostgreSQL, Docker*

github.com/yuneshbyte01/digital-wallet-api

- Built a production-style fintech backend supporting wallet creation and peer-to-peer transfers
- Implemented a double-entry ledger system ensuring accurate and fully auditable financial transactions
- Designed an idempotent transfer mechanism to prevent duplicate payments and ensure data integrity
- Secured APIs with JWT, refresh token handling, RBAC, and optimistic locking for concurrency control
- Added KYC workflow, fraud prevention via rate limiting, and compliance-ready audit logging

Hamro Chalchitraghar – Movie Ticket Booking System — *Spring Boot, PostgreSQL*

github.com/yuneshbyte01/hamro-chalachitraghar-backend

- Built a backend system for managing movies, showtimes, seat availability, and ticket bookings
- Developed REST APIs for ticket reservation and user management following layered architecture
- Designed a normalized database schema to handle concurrent bookings and efficient data retrieval

WanderWise – Travel Recommendation System — *Spring Boot, MySQL*

github.com/yuneshbyte01/Wander_Wise

- Developed a recommendation engine suggesting destinations based on user preferences and history
- Built REST APIs for destination browsing, user profile management, and preference tracking
- Optimized SQL queries and indexing strategies to improve recommendation response times

Spring Auth Template – JWT Authentication System — *Spring Boot, Spring Security, MySQL*

github.com/yuneshbyte01/spring-auth-template

- Built a reusable, production-ready authentication system with JWT and refresh token support
- Implemented RBAC with fine-grained endpoint authorization via a custom Spring Security filter chain
- Designed a modular, scalable architecture intended for reuse across multiple Spring Boot applications

TECHNICAL SKILLS

Languages: Java, SQL, Python, JavaScript

Backend: Spring Boot, Spring Security, Hibernate/JPA, REST APIs, JWT

Databases: PostgreSQL, MySQL, MongoDB

Tools: Git, GitHub, Maven, Postman, IntelliJ IDEA, Docker

Frontend: Angular, HTML, CSS, JSP

EDUCATION

B.Sc. Information Technology | Presidential Graduate School | 2023 – Present

Diploma in Civil Engineering | Mahendra Rastriya Secondary School | CGPA: 3.28 | 2019 – 2023
